

glycosade®

DESCRIPTION

A hydrothermally processed high amylopectin cornstarch
USE UNDER MEDICAL SUPERVISION

INDICATIONS

For the dietary management of hepatic Glycogen Storage Diseases (GSD) where the use of a long acting cornstarch is indicated. Suitable from 5 years of age.

DOSAGE AND ADMINISTRATION

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

RECOMMENDED PREPARATION

Measure the required amount of liquid into a container with a lid.

1. Add the required amount of Glycosade to the container.
2. Typically, a packet of Glycosade can be added to 120 ml (4 fl oz) of cold water or other suitable fluids.
3. Secure lid and shake until the powder is dissolved.
4. Glycosade is now ready to use.

DO NOT HEAT OR WARM GLYCOSAIDE AS THIS DESTROYS THE PROPERTIES OF THE STARCH.

The product should be freshly prepared and consumed immediately.

STORAGE

Store in a cool dry place.

Packets are designed for single use and should be used immediately once opened.

PACK SIZE

30 x 60 g (2.1 oz) packets

NET WT.

1.8 kg (63 oz) (3.9 lb)

Available in Unflavored.

IMPORTANT NOTICE

Must only be used in individuals with proven hepatic GSD where the use of long acting cornstarch is indicated under strict medical supervision.

Suitable from 5 years of age.

Not for intravenous use. For enteral use only. Not for use as a sole source of nutrition. Glycosade may also be given through a feeding tube. Not intended for use as a continuous enteral feed. Administer as a bolus to prevent possible tube blockage.

Glycosade® Nutrition Information
